# Full recorded clip | 19 planning references | 18 conditional chains | sparse inference

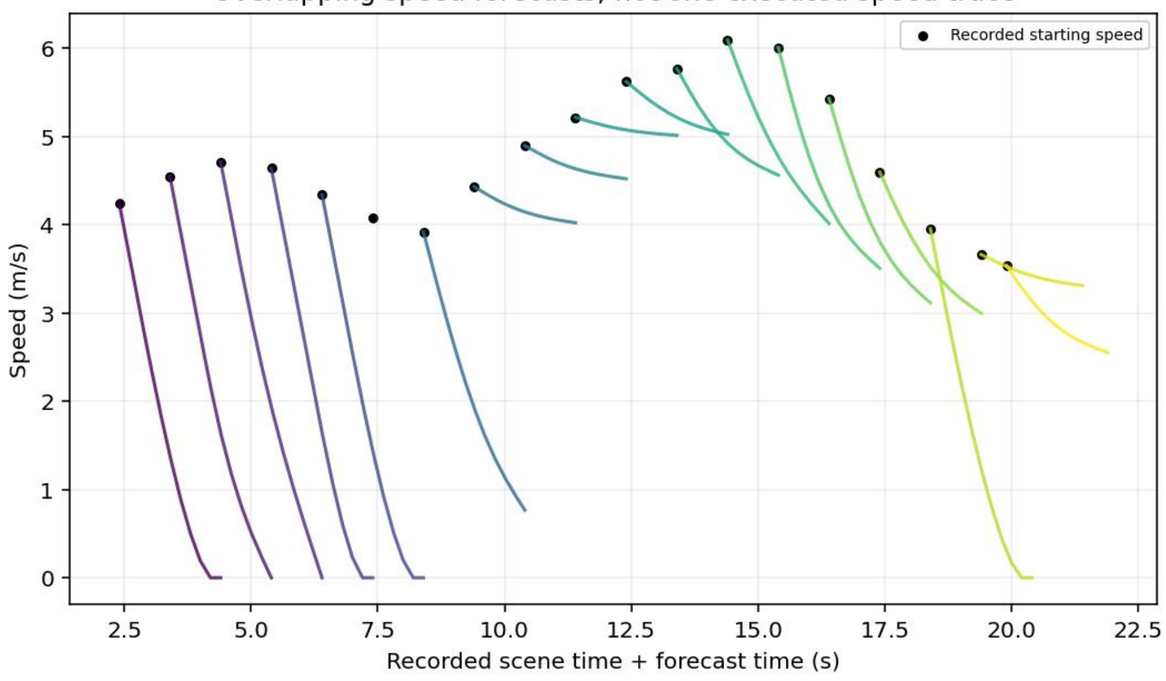

Selected answer: green PASS / red FAIL / blue N.A. / yellow UNKNOWN / gray not reached

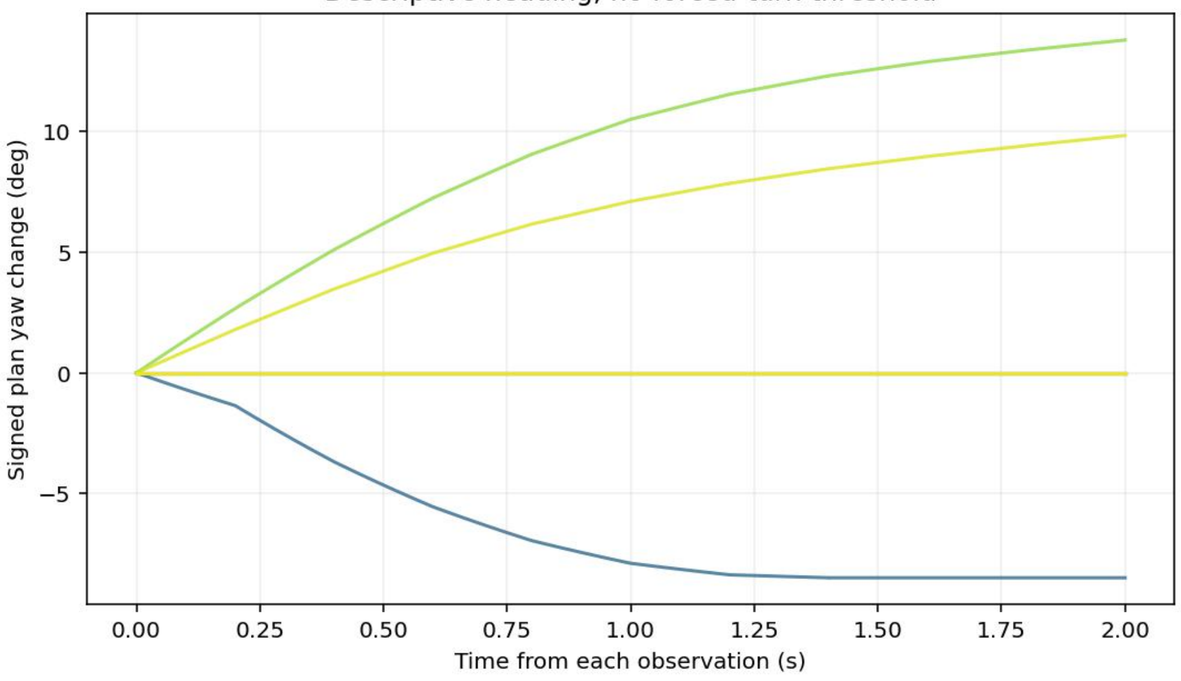

DISPLAY ONLY alignment; independent forecasts

Overlapping speed forecasts; not one executed speed trace

Descriptive heading, no forced-turn threshold

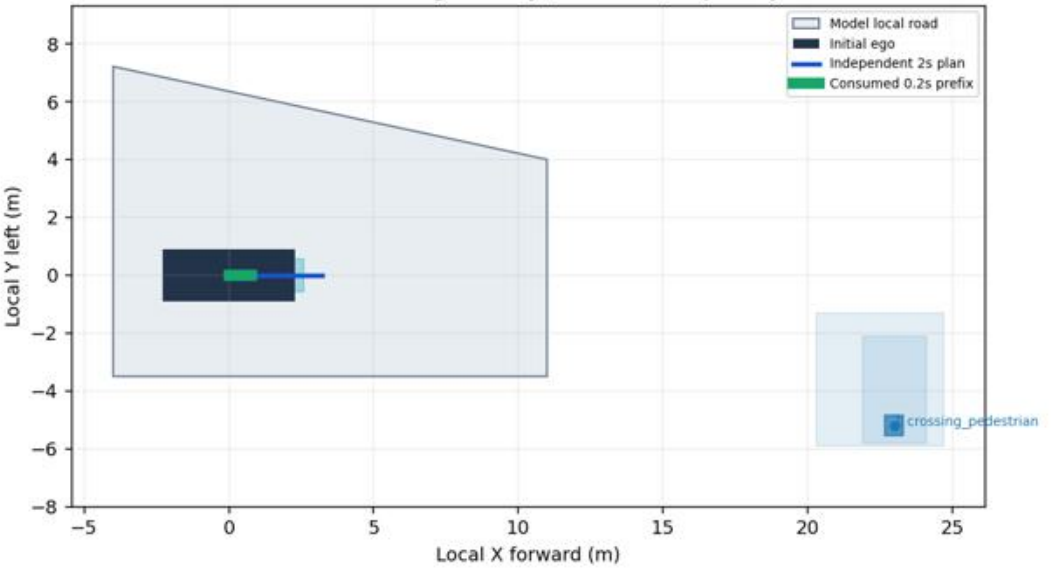

Recorded observations; every 2s forecast and consumed 0.2s prefix starts independently. Unqueried frames have NO_NEW_PLAN. No stitched execution, counterfactual observations, real vehicle control or GT evaluation.
Source groups: 3; clip-wide preflight failures: 0 (counted once, not once per reference).

# frame_005 | +2.40s | REVISION_PASS

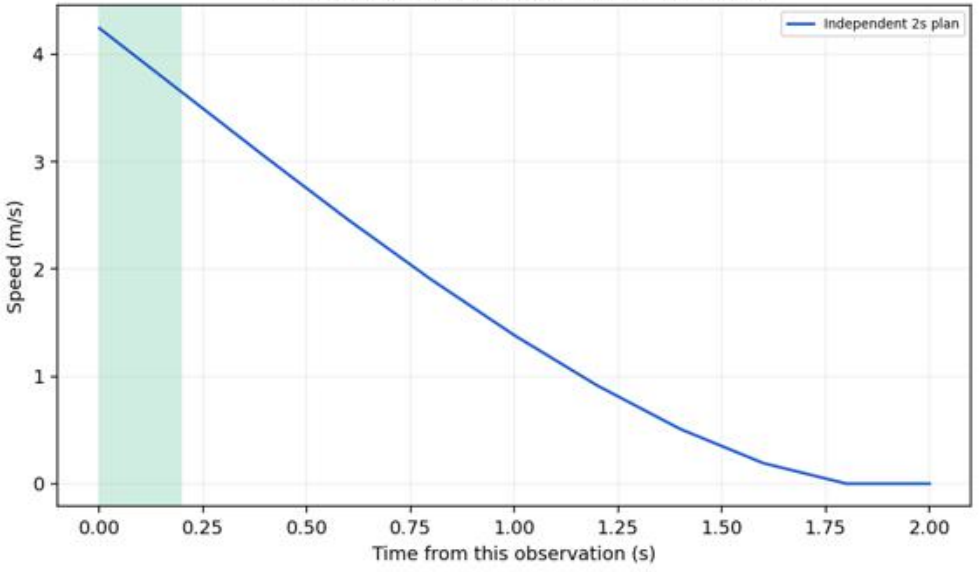

Original image; model dots use display-only z=0 projection

Native model geometry / corridor / trajectory

This forecast only; long tail is not executed

frame_005 | recorded t=+2.400s
Status: REVISION_PASS | block: NONE
Generating POST attempts: 2 | source: online_model
Selected source group: long_clips_20261029_v3_parking_bend; all group attempts counted above.

Turn amplitude task: NOT_APPLICABLE; no forced turn
Unexplained stationary hold review required: False
Behavior / road agreement: independent image review pending.
Image markers are model z=0 projections, not detections or GT.
Model uncertainty is uncalibrated; GT not evaluated.

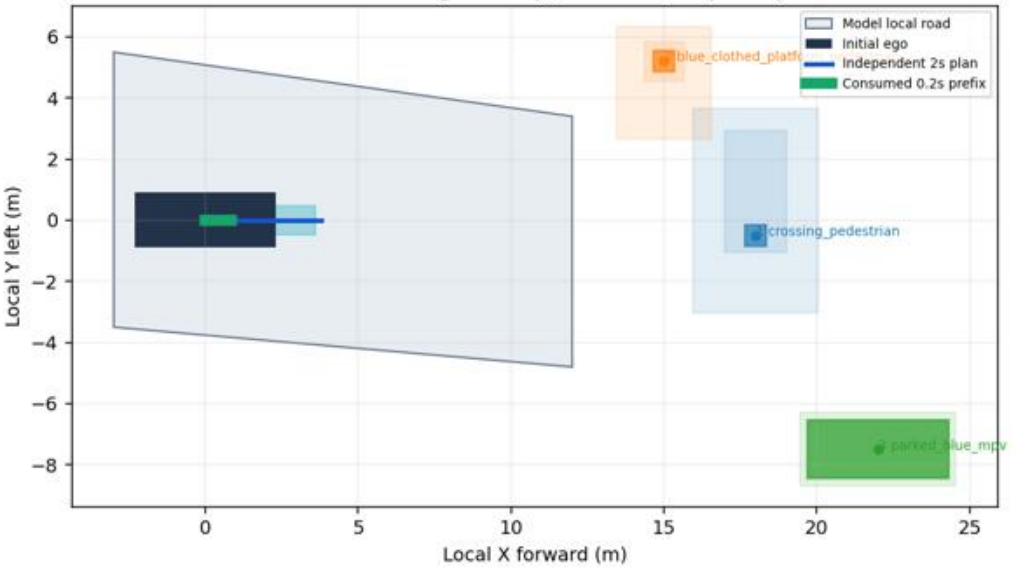

Recorded observations; every 2s forecast and consumed 0.2s prefix starts independently. Unqueried frames have NO_NEW_PLAN. No stitched execution, counterfactual observations, real vehicle control or GT evaluation.

# frame_037 | +18.40s | FIRST_ATTEMPT_PASS

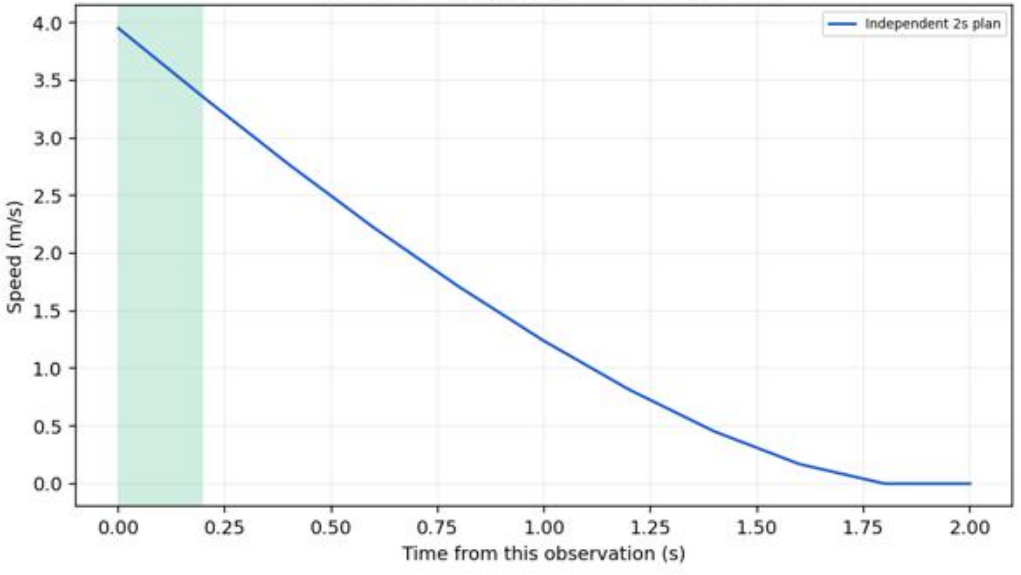

Original image; model dots use display-only z=0 projection

Native model geometry / corridor / trajectory

This forecast only; long tail is not executed

frame_037 | recorded t=+18.400s
Status: FIRST_ATTEMPT_PASS | block: NONE
Generating POST attempts: 1 | source: online_model
Selected source group: long_clips_20261029_v3_parking_bend; all group attempts counted above.
Charged attempts: 1 | dispatch/response unknown: 0
Decision: stop_yield | desired v: 0
Stages: SERVICE=PASS | BUSINESS_SCHEMA=PASS | T1=PASS | T2=PASS | T3=PASS | T4=PASS | TURN_TASK=NOT_APPLICABLE | ACCEPTOR=PASS | EXECUTION=PASS
Declared actors: 1 | T4: PASS
Prefix: MOVING_PREFIX | consumed: True
Displacement: 0.7303894104662488 m | end speed: 3.351947059737765 m/s
Minimum conditional clearance: 2.1589712162035823 m
Plan yaw change: 1.4788371089038001e-06 deg | lateral: 7.832654761388084e-08 m
Consumed prefix yaw change: 5.577290630600781e-07 deg
Turn amplitude task: NOT_APPLICABLE; no forced turn
Unexplained stationary hold review required: False
Behavior / road agreement: independent image review pending.
Image markers are model z=0 projections, not detections or GT.
Model uncertainty is uncalibrated; GT not evaluated.

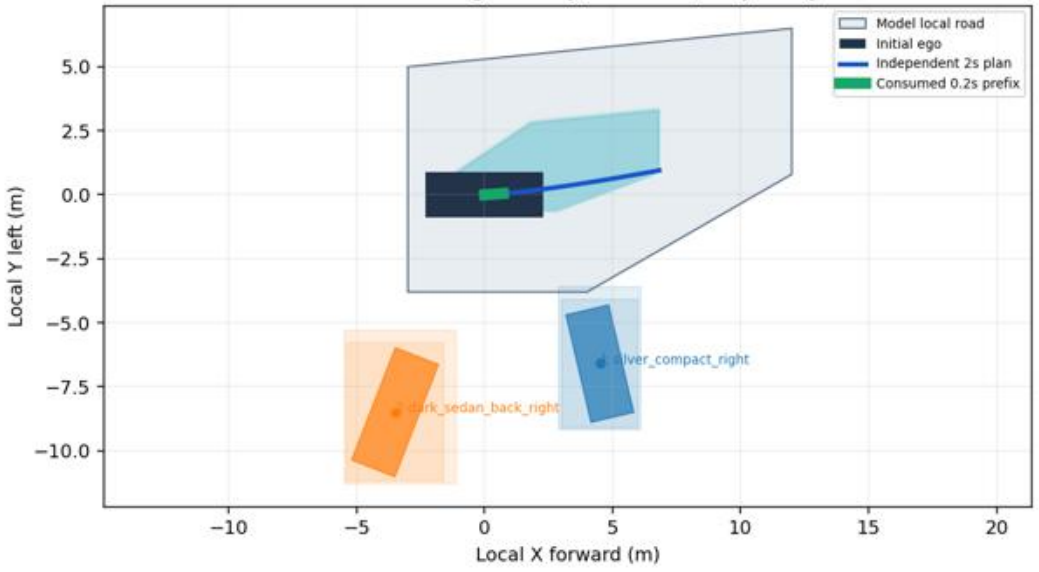

Recorded observations; every 2s forecast and consumed 0.2s prefix starts independently. Unqueried frames have NO_NEW_PLAN. No stitched execution, counterfactual observations, real vehicle control or GT evaluation.

# frame_039 | +19.40s | FIRST_ATTEMPT_PASS

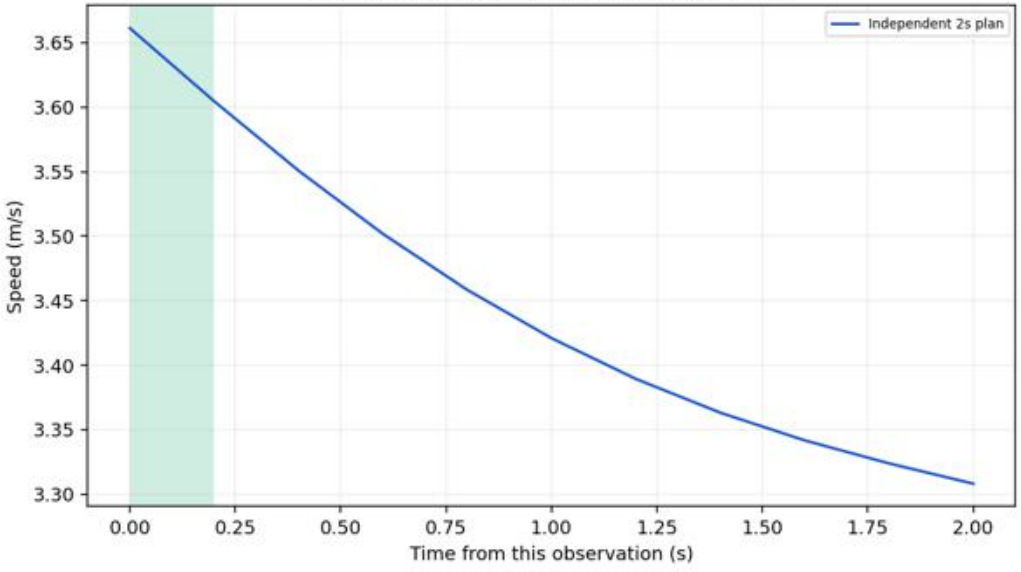

Original image; model dots use display-only z=0 projection

Native model geometry / corridor / trajectory

This forecast only; long tail is not executed
